Absolutely any object can be placed on absolutely any background, create an incredible fantastic plot, objects that do not exist in reality, build a real object from various passages of images of other objects. With the help of collage, you can easily change the size of the object, its shape and shape, color scheme.

Collage application

Collage is widely used in advertising, as it allows you to create a unique and extraordinary advertising image. Collages can reflect both beautiful realistic plots and fantastic ones. The possibilities of collage are limited only by the imagination of the photo artist.

1 Production sphere

Collage used in the advertising and production sphere is a rather complicated and painstaking process that requires not only creative thinking, but also professional skills.

2 The process of creating a collage includes:

- Development of the idea and artistic concept of collage;
- Changing the background or removing it;
- Adding redundant or removing new elements;
- Use of special effects;
- Drawing parts.
